Print length : 72 pages

- **Recycling reduces the amount of waste we produce.** When we recycle, we're keeping trash out of landfills and incinerators. This helps to reduce air and water pollution, and it also conserves natural resources.
- **Recycling saves energy.** Making new products from recycled materials uses less energy than making them from new materials. This helps to reduce greenhouse gas emissions, which contribute to climate change.

- **Recycling creates jobs.** The recycling industry employs millions of people around the world. These jobs help to support families and communities.

What can kids recycle?

Kids can recycle many different materials, including:

- **Paper:** This includes newspapers, magazines, junk mail, and cardboard.
- **Plastic:** This includes bottles, jugs, tubs, and lids.
- **Metal:** This includes cans, foil, and aluminum.
- **Glass:** This includes bottles and jars.

How can kids recycle?

There are many ways kids can recycle. Here are a few tips:

- **Check with your local recycling program to see what materials they accept.**
- **Rinse out food and drink containers before recycling them.**
- **Flatten cardboard boxes before recycling them.**
- **Put recyclables in the designated recycling bin or container.**

Recycling is a great way to help the environment and our planet. It's something that kids of all ages can do to make a difference. By recycling, kids can help to reduce waste, save energy, and create jobs.
